

## **Westwater Resources Retains Porter, LeVay & Rose as its Investor Relations Advisor of Record**

### **Furthering Investment Community Engagement**

**CENTENNIAL, Colo., June 13, 2018 – Westwater Resources, Inc. (“Westwater,” or the “Company”)** (Nasdaq: WWR), an energy materials development company, announced today that it has retained long-standing agency Porter, LeVay & Rose Inc., as its investor relations advisor of record, to lead the Company’s awareness efforts with the investment community.

Christopher M. Jones, President and Chief Executive Officer, said, “Porter, LeVay & Rose came highly recommended due to their unique and strategic approach to investor relations and proven track record of generating positive results for small-cap companies. Our continued work to diversify our green energy portfolio into battery materials has now resulted in the acquisition of Alabama Graphite Corp., giving us first mover advantage in a key component of electrical storage devices. Simply put, combining our experienced management team, our solid financial position, and our attractive assets – all with significant upside potential, we have a tremendous story to tell. With Porter, LeVay & Rose, we look forward to further expanding our investor base and communicating to potential investors, thanks to the experience and expertise of PLR. We are excited for what is yet to come.”

Michael Porter, President of Porter, LeVay & Rose, commented, “We are delighted to be working with Westwater Resources. The Company’s recent expansion of its green energy portfolio in America, places Westwater into an excellent strategic position within the market, as demand for various battery-powered technology continues to strengthen. We have seen the ambitious plans for Alabama Graphite over the next several months, and we are excited to be a part of telling the Company’s story to Wall Street,” concluded Mr. Porter.

#### **About Westwater Resources**

WWR is focused on developing energy-related materials. The Company’s battery materials projects include lithium mineral properties in three prospective lithium brine basins in Nevada and Utah and now with the acquisition of AGC, the Coosa Graphite Project and the associated Coosa Graphite Mine located across 41,900 acres in east-central Alabama. WWR’s uranium projects are located in Texas, New Mexico and the Republic of Turkey. WWR remains focused on advancing the Temrezli in-situ recovery (ISR) uranium project in Central Turkey when uranium prices permit economic development of this project. In Texas, the Company has two licensed and currently idled uranium processing facilities and approximately 11,000 acres (4,400 ha) of prospective in-situ recovery uranium projects. In New Mexico, the Company controls mineral rights encompassing approximately 188,700 acres (76,394 ha) in the prolific Grants Mineral Belt, which is one of the largest concentrations of sandstone-hosted uranium deposits in the world. Incorporated in 1977 as Uranium Resources, Inc., WWR also owns an extensive uranium information database of historic drill hole logs, assay certificates, maps and technical reports for the Western United States. **Cautionary Statement**

This news release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are subject to risks, uncertainties and assumptions and are identified by words such as “expects,” “estimates,” “projects,” “anticipates,” “believes,” “could,” and other similar words. All statements addressing events or developments that WWR expects or anticipates will occur in the future, including but not limited to statements relating to the Company’s growth, developments at the Company’s projects, the future production of graphite, including on a pilot scale, and future sales of graphite, including as a first mover for key components of electrical storage devices, and the Company’s liquidity and cash demands, including future capital markets financing and disposition activities, are forward-looking statements. Because they are forward-looking, they should be evaluated in light of important risk factors and uncertainties. These risk factors and uncertainties include, but are not limited to, (a) the Company’s ability to successfully integrate AGC’s business into its own, and the risk that additional analysis of the Coosa Graphite Project may result in revisions to the findings of WWR’s initial optimization study; (b) the Company’s ability to raise additional capital in the future; (c) spot price and long-term contract price of graphite, uranium and lithium; (d) risks associated with our foreign and domestic operations; (e) operating conditions at the Company’s projects; (f) government and tribal regulation of the graphite industry, uranium industry, the lithium industry, and the power industry; (g) world-wide graphite, uranium and lithium supply and demand, including the supply and demand for lithium-based batteries; (h) maintaining sufficient financial assurance in the form of sufficiently collateralized surety instruments; (i) unanticipated geological, processing, regulatory and legal or other problems the Company may encounter in the jurisdictions where the Company operates or intends to operate, including in Alabama, Texas, New Mexico, Utah, Nevada and Republic of Turkey; (j) the ability of the Company to enter into and successfully close acquisitions or other material transactions, (k) the results of the Company’s lithium brine exploration activities at the Columbus Basin, Railroad Valley, and Sal Rica projects, and the possibility that future exploration results may be materially less promising than initial exploration result; (l) any graphite, lithium or uranium discoveries not being in high enough concentration to make it economic to extract the metals; and (m) other factors which are more fully described in the Company’s Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, and other filings with the Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize or should any of the Company’s underlying assumptions prove incorrect, actual results may vary materially from those currently anticipated. In addition, undue reliance should not be placed on the Company’s forward-looking statements. Except as required by law, the Company disclaims any obligation to update or publicly announce any revisions to any of the forward-looking statements contained in this news release. The results of the initial optimization study are preliminary in nature and subject to revision following WWR’s further analysis of the Coosa project.
